APPLICATIONS NOTES

SUPPRESSION COMPONENTS AND THE LOW VOLTAGE DIRECTIVE

In accordance with the DTI Guidance notes on UK Regulations - July 1995, page 7, components as such are not covered by the requirements of the 1994 Regulations.

However, all MPE Ltd, suppression components are designed to comply with the appropriate safety regulations, with regard to creepage and clearance distances.

All components are also designed to meet the appropriate safety requirements with regard to voltage withstand and are 100% tested during manufacture.

It is essential that all suppression components are fitted as recommend in our catalogue General Notes section and in accordance with the latest IEE regulations.
