

APPLICABILITY OF MPE PRODUCTS TO EU REACH & UK REACH REGULATIONS

Registration, Evaluation, Authorisation of Hazardous Chemicals

MPE Limited (MPE) is fully aware of the requirements of both the current EU REACH and UK REACH regulations and the dates by which various parts must be implemented. MPE regularly work with both our raw material suppliers and customers, to ensure full compliance with REACH at every stage.

MPE are classified as a downstream user being a manufacturer and are therefore not required to pre-register or register articles directly.

We have asked our suppliers to confirm that they have pre-registered under EU REACH and UK REACH.

Currently, MPE is not aware of any product, in its range, being affected due to the requirements of either EU REACH or UK REACH regulations.

In the area concerning Substances of Very High Concern (SVHC), from the information presently available, there is no indication from our suppliers that any of the components that they supply to MPE contain such substances. This will be regularly reviewed with suppliers and information released by the European and UK authorities responsible for REACH regulations.

If you have any need to contact MPE with regard to a REACH related matter, then please make initial contact: via
