

APPLICABILITY OF MPE PRODUCTS TO THE REACH DIRECTIVE

Registration, Evaluation, Authorisation of Hazardous Chemicals

MPE Ltd is fully aware of the requirements of the European REACH regulations and the dates by which various parts must be implemented. Therefore we are working with both our raw material suppliers and customers to ensure full compliance with REACH at every stage.

MPE are classified as a downstream user being a manufacturer and are therefore not required to pre-register or register articles directly.

We have asked our suppliers to confirm that they have pre-registered under REACH.

We have also asked the suppliers if they foresee any problems in the maintenance of the supply of all the chemicals supplied to ourselves. Currently MPE Ltd is not aware of any product, in its range, being affected due to the requirements of the REACH DIRECTIVE.

In the area concerning Substances of Very High Concern (SVHC), from the information presently available there is no indication from our suppliers that any of the chemicals that they supply to MPE contain such substances. However, this will be kept under consideration, subject to reviews and information released by the ECHA.

If you have any need to contact MPE Ltd with regard to REACH related matters then please make initial contact: via
