Protecting defence assets at IDEF 2023 in Istanbul

The IDEF International Defence Industry Fair has been held every two years in Turkey since 1993 and in Istanbul since 2009. Hosted by the Turkish Ministry of National Defence (Millî Savunma Bakanlığı), IDEF is among the top five defence exhibitions in the world. Among the visitors last time were numbered 163 official delegations from over 80 countries and 70,000 visitors from 94 countries.

The technologies on display span land, sea and air defence and security, equipment supply, logistics and transportation. The 16th IDEF event will run from 25th to 28th July 2023 in 14 halls of the TÜYAP Fair and Congress Center in Istanbul.

There MPE will again be supporting and contributing to the large exhibition space of its territory distributors IMCA Elektronik, stand 700 in Hall 7.

John Jephcott of MPE will be in attendance on the stand, which will feature many of his company's EMC and EMP protection products, such as high-performance feedthrough and installation filters for fixed and mobile military shelter applications and pluggable and hardwired TEMPEST filters.

Cemal Alpay, Managing Director of IMCA Elektronik, commented:

“Having exhibited successfully at many previous editions of IDEF, IMCA will again have a large stand and presence at this year's event. IDEF provides IMCA with a fantastic platform to meet with a large number of our principal clients and explore new business opportunities.

“Specifically, for MPE's products, the IDEF exhibition allows us to interact directly with end-users and integrators from the fixed and mobile shelters market, where IMCA and MPE are the clear market leaders.”
